## SKILLS

## EDUCATION

### Certification

MERN Stack Jul 2022

- Programming Pathshala

UI Design Feb 2023

- Growth School

Node JS Oct 2022

- Udemey

### Schooling

**B.Tech in CSE(3rd year)**

Lovely Professional Apr 2020

University | **8.34 CGPA** -

Apr 2024

**Higher Secondary** Jun 2019

Sri Chaitanya | -

97% Mar 2020

## WORK EXPERIENCE

### MAIN PROJECT ' MY STARTUP

Aug 2022 - Present

#### *Foozy*

MERN stack

Product Development

Figma

Canva

- Built and launched a food preordering platform :
  - Empowered over 5 local vendors to collect online orders.
  - Executed a successful pilot run for 40 days, Partnered with with 2 real shops and serving 300+ happy customers.
  - Achieved sales of INR 50,000 during the pilot run, achieving an increase in revenue for participating vendors.
- Technology and Design:
  - Leveraged Next.js and Tailwind CSS to build a highly interactive and user-friendly interface, resulting in a 30% reduction in order processing time.
  - Executed the backend using Express.js and MongoDB, enhancing data management and achieving a improvement in system performance.
  - Crafted the UI/UX using Figma, resulting in a decrease in user complaints and a increase in customer satisfaction.
- Deployment and Collaboration:
  - Rolled out the frontend on Vercel, backend on Railway, and database on MongoDB Atlas, ensuring a reliable and scalable platform with uptime.
  - Performed user research and obtain feedback from users to persistently refine the platform's user experience and drive data-driven design decisions.

### MINI PROJECTS

Jan 2023 - Jul 2023

#### *Freelance*

Next.js

TailWind CSS

Communication

- Collaborated with diverse clients to:
  - Enhanced conversational skills and styling abilities.
  - Exceeded requirements and facilitated clear communication. .
  - Nurtured creativity and remained abreast of design trends to deliver exceptional results across industries.
  - Implemented effective feedback loops to ensure client satisfaction and continuous improvement.

### UI/UX CONTRIBUTION

Jun 2023 - Present

#### *Sellular*

Figma

Team Work

Work Efficiency

- Collaborated with design and development teams to:
  - Conduct user research, gather feedback from students,
  - Employ industry-standard design tools to create wireframes, mockups, and prototypes.
  - Work closely with 4 teams to understand project requirements and deliver effective design solutions.
- Created design systems and style guides for:
  - Consistent branding and user experience.
- Created and optimized 5 visual assets, resulting in:
  - Optimal website and application performance.
  - faster loading times by using vector images.

Can you tell me about yourself?

Hello, I am Mohith! A passionate and self-taught front-end developer located in Hyderabad, India. With a strong flair for creativity and web development, I excel at crafting responsive and user-friendly websites from scratch.

Over the past year, I have been dedicated to transforming my knowledge into captivating web experiences, assisting numerous clients in establishing their online presence. Always eager to stay up-to-date with the latest technologies and frameworks, I am committed to delivering innovative solutions for the digital world.

How is this AI chatbot working?

1. When a user inputs a question in the frontend, it is sent as a POST request to the FastAPI backend.
2. The backend receives the user's question and processes it using the **langchain library** to prepare it for input to the AI model.
3. The preprocessed question is then sent as a POST request to the OpenAI API using the openai library.
4. The GPT-3.5-turbo model generates a response based on the input question and returns it to the backend.
5. The backend receives the AI-generated response and indexes it using the llama-index (trained it using my resume and few more documents) library for efficient storage and retrieval.
6. The response is sent back to the frontend, where it is displayed to the user as the answer to their question.

Projects that I worked on:

#### **Main project 'My startup' Foozy:**
